

Some selected papers from QSIC 2007 will be considered (in extended versions) for possible publication in a special issue of The Journal of Systems and Software (JSS).

These papers would still have to meet the publication quality set by JSS before they could be published. To assure this, the authors would be required to revise their papers based on the comments received from QSIC reviewers. In addition, the revised version along with the QSIC reviewers' comments would be sent to at least two reviewers for further evaluation. Once again, authors would have to satisfactorily respond to the comment(s) from these reviewers in order for their papers to be officially accepted.

Special issues of previous QSIC conferences include

- 2000: International Journal of Software Engineering and Knowledge Engineering
- 2001: Information and Software Technology
- 2003: Information and Software Technology
- 2004: Journal of Systems and Software
- 2005: International Journal of Software Engineering and Knowledge Engineering
- 2006: International Journal of Software Engineering and Knowledge Engineering
